Badger Plastics and Supply's Tivar 88-2 is a low coefficient of friction polymer that offers superior release and non-stick performance properties, along with excellent slide abrasion wear and corrosion resistance. Tivar 88-2 improves bulk material flow in silos, bins, bunkers, chutes, hoppers and conveying equipment by reducing or eliminating problems with sticking, ratholing and bridging.

The bulk material release and non-stick properties of Tivar 88-2 are unmatched in the industry. Tivar 88-2 is available in sheet thickness from 1/4" - 2", in standard sheet sizes of 4ft x 10ft, with custom oversize butt welded shapes available.
